Training & Learning Guide

Mandatory training, learning plans, mentoring, and progress reviews

Document ID	LND-TRN-008
Audience	All employees and managers
Version	1.0 — Demo
Owner	People Operations / relevant department
Status	Sample content — approval required

Important: Fictional sample company and policy pack created for OnboardIQ demonstration and ingestion testing. These documents are not legal advice and are not actual company policies. Replace with approved company content before real use.

1. Learning expectations

- Employees should understand the skills required for their role, complete assigned mandatory training, and discuss development goals with their manager.
- Training assignments may depend on department, system access, location, customer commitments, and job responsibilities.

2. Types of training

Training type	Examples	Typical owner
Company orientation	Values, organization, internal tools	People Operations
Compliance and conduct	Code of conduct, respectful workplace	People Operations / Compliance
Security and privacy	Phishing, data handling, incident reporting	Security / Privacy
Role-specific	Engineering practices, sales processes, customer support workflows	Department lead
Leadership and development	Coaching, communication, project management	Manager / Learning team

3. Creating a learning plan

- Choose two or three outcomes for the first month rather than trying to learn every system at once.
- Break each outcome into practical tasks, learning resources, and a way to demonstrate progress.
- Ask your manager or buddy to identify the authoritative resources and the people who can answer questions.
- Schedule short check-ins to discuss blockers, confidence, and next steps.

4. Example 30-day learning plan

Timeframe	Focus	Evidence of progress
Week 1	Understand role, team, tools, and required policies	Can explain responsibilities and find support channels
Week 2	Complete required training and guided practice	Training records complete; basic workflow demonstrated
Week 3	Complete a small role-related task	Task reviewed and feedback captured
Week 4	Review goals and identify next skills	Manager and employee agree on next priorities

5. Completion and records

- Complete courses by the deadline assigned in the official learning system.
- If a course is inaccessible or a deadline cannot be met, notify the course owner or manager before the deadline when possible.
- Do not mark training complete for another person or bypass required assessments.

- Training records should be maintained in the approved system and accessed only by authorized staff.

6. Asking effective questions

- Explain what you are trying to achieve and what you have already tried.
- Include relevant error text or a minimal example, but remove credentials, personal data, and confidential information.
- State the impact and urgency. If a task is blocked, tell the responsible person early.
- After resolving a repeated issue, consider adding the solution to the team's knowledge base.

End of Training & Learning Guide. This is fictional demonstration content for OnboardIQ.
