Employee Handbook: General Workplace Guidelines

ONBOARDIQ — METADATA FILTER TEST DOCUMENT

Metadata field	Value
document_id	TEST-DOC-001
visibility	ALL_EMPLOYEES
department	People Operations
document_type	PDF

Document content

Purpose

This sample document contains general workplace guidance for testing the OnboardIQ retrieval pipeline. It is intended to be accessible to all employees.

Working hours

Employees should follow the working hours and attendance process communicated by their team. If they need clarification, they should contact their manager or People Operations.

Leave requests

Employees should submit leave requests through the company's designated HR process and wait for approval before treating leave as confirmed.

Information security

Employees should protect company information, use approved systems, and report suspected security incidents through the official internal reporting channel.

Testing note: the visibility value printed above is a suggested payload value. Your ingestion pipeline must explicitly attach this metadata to each Qdrant point; the PDF text itself does not automatically become Qdrant payload metadata.
